

# Vermont Community Health Equity Partnership

## Community Funding: Moving Decision-Making from the Boardroom to the Community

### Funding Principles

- The application processes and reporting requirements will be easy to understand and intentionally designed to allow organizations new to state funding to apply.
- Funds will: support positive change toward addressing health inequities and meaningful interactions with residents; build local skills, knowledge, leadership, or confidence; directly benefit people who have first-hand experience with health inequities.

### Local Collaboratives

Local Collaboratives in each VT Department of Health District will have \$150,000 to support local initiatives.

### IMPACT

Greater health equity and lessons learned to build ongoing capacity to assure future plans, activities, and resources to prevent COVID infection (or transmission) and address persistent health inequities in Vermont.
