

# ONE Vibrant Communities | Root Causes

# People End Up in Crisis and in the ER

## Current Supports

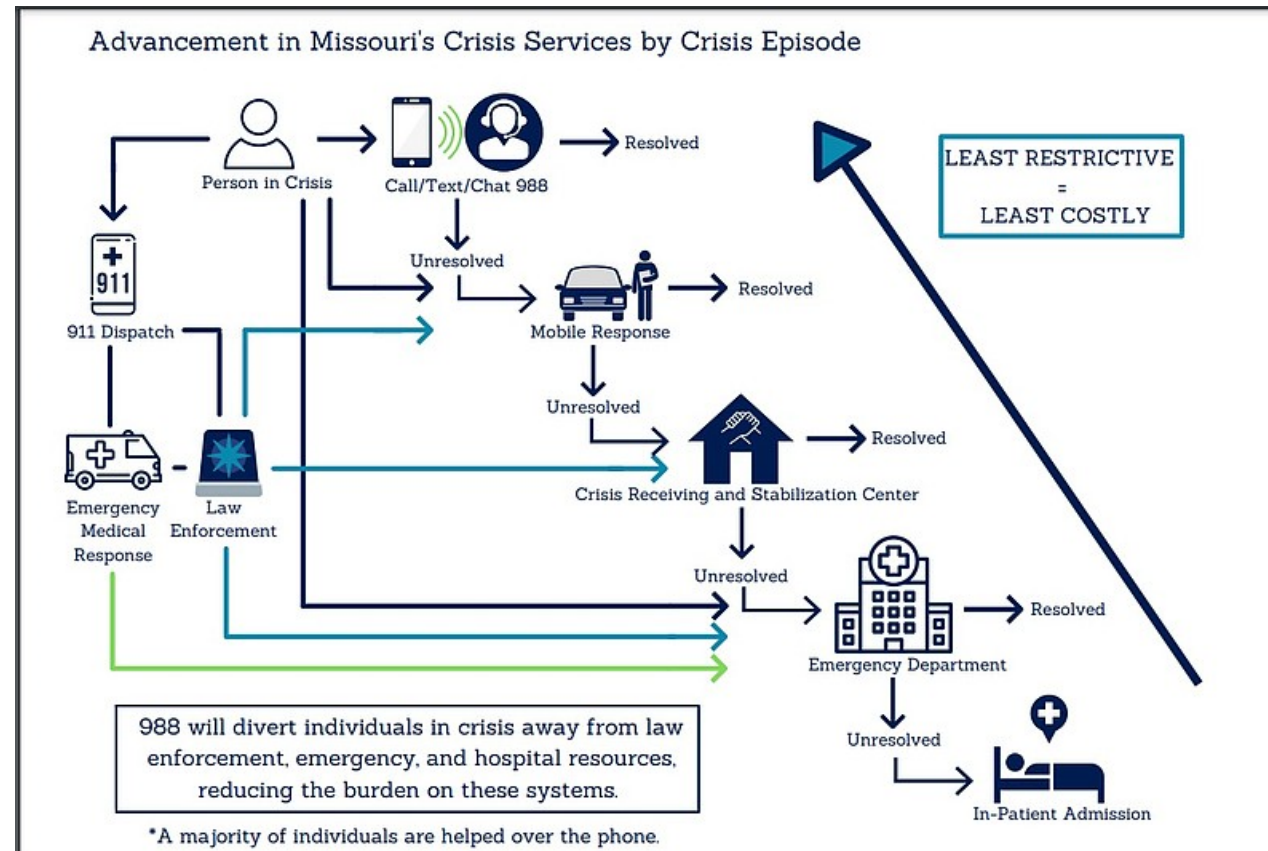

- SUD Emergency Supports - JTR – Peer, Coach supports in ED - 24/7; 365 – SUD Peer Certification Process/Training/Supervision
- Emergency Services – 24/7; 365 – In-person/virtual/phone and assessment supports
- Enhanced ES – VSP embedded full time MH Crisis Specialist
- CARE Bed – 2 bed crisis unit with 24 hour staffing – Hospital diversion or step-down option.
- National Suicide Prevention Lifeline – NKHS is a certified Crisis Center – 24/7 – phone/text/chat

## Remaining Gaps/Challenges:

- People discharged back to the community or 'home' with no other alternative
- Intermediate placements
- Process of EE can be confusing to the community – 'why were they discharged?'; 'Why can't you hold them?'
- Stigma and community fear
- Knowledge of current services to reach out to, before the ER
- Covid – Isolation and Loneliness
- PIP and CARE Bed are in St. J. only
- Children's specific crisis supports

# Future Potential Model for Services -

# Lack of Adequate Supports for Detox and Sober Living

## Current Supports

- PIP Bed– Assessment and diversion services –
- JTR– Peer Supports and coaching availability – can respond to emergency situations and support people at the emergency department- 24/7; 365 – Training/Certification/Supervision
  - Can support people with accessing and navigating community services.
- BAART and SaVida – MAT Services
- Regional Partnership Program (Lund DCF Collaboration)
- Hub and Spoke Model

## Remaining Gaps

- Hub and Spoke– NEK has the fewest spokes in the State – reduced access to MAT services\* ([Hub and Spoke Eval 2017](#))
- No social detox programs in our area (only one in the state)
- PIP and CARE Bed are located in Caledonia only (St. J)
- Navigating insurance process to access services. – Underinsured – not insured.
- Timing of access to services – no same-day services

# Lack of Understanding of the Design / Performance of Current System

## Current Supports

- NKHS – Designated Agency – Mostly Medicaid funded – Core/Required services:
  - CRT – IDDS – CYFS – ES – SUD – Eldercare – Psychiatry and med services –
- FQHC's – NCHC; NVRH; NCH
  - Behavioral Health
  - Emergency Department
- SUD Services – JTR; BAART; SaVida
- Peer Supports – JTR; WRAP; Cadre
- Accountable Health Communities – NEKProsper!; VibrantONE
- Accountable Care Organization -

## Remaining Gaps

- Access – Capacity to serve the need
- Access of information – where do you find services/Resources – even among providers
- Community engagement – opportunities to learn or engage with the system
- NIMBYism – People are generally supportive of services until they are located near them
- WIFM – “What is in it for me” – needs to be addressed
- Sharing of data – what has been accomplished in the area
- Lack of Staffing -

# Lack of Qualified Workforce

Pay - Stress & Burnout - Stigma

## Current Situation

- Designated Agencies –
  - Licensed, Clinical Therapists;  
Service Coordinators;
- FQCHs/Hospitals –
  - Nurses, physicians, BH health professionals
- Peer Certification – Currently SUD peer certification exists

## Remaining Gaps

- Expense of Education – Expense of education does not translate into higher paying job for social service work
- Geography – Rural, remote, low population, housing options
- Technology – Telehealth and internet access gaps.
- Education capacity –
  - There is an interest but the pipeline is backed up – e.g. Nursing – schooling and education...
- Lack of capacity of MH Peer Supports/Certification -
  - Limited infrastructure
  - Impacted by Covid

# Gaps?

- Lack and awareness of Prevention Services
- Gaps in the continuum of care that cause stressors on current supports
- Shortage of qualified Staff
- Rurality
  - Limited internet bandwidth
  - Limited accessibility to services outside of the '4 walls'
- Shortages and Access barriers have the biggest impact on uninsured and underinsured.
- Lack of well defined system of care/philosophy/approach to MH/SUD supports in the community
- Community awareness and education about the System of Care

# Recommendations – Collective Impact

- Cross-partner education and training?
  - Multiple education opportunities
- Community education and training?
- Community Engagement
  - Community event – BBQ, open house, resource sharing.
- Asset mapping? What supports exist in our community – is this fully known?
- What assets are we not currently accessing?
- Peer supports
- Community engagement – how do we leverage the power of communities
